CSCE476/876 **Spring 2002**

Homework 3: Learning Lisp with the Adaptive Remote Agent (II)

Assigned on: Wednesday February 12, 2002.

Due: Wednesday February 20, 2002

Quiz: Wednesday February 20, 2002

As you can easily guess, this homework is the continuation of the previous one.The goal is that you learn and experiment with the Adaptive Remote Agent available on the Web:
`http://apsymac33.uni-trier.de:8080/elm-art/login-e`

You are requested to login into the agent and run the *last three lessons* by Wednesday February 20. You will be graded as follows:

- (70 points) A quiz will be given in class with questions taken from the tutorial, randomly.
- (30 points) A short but substantive analysis in which you state what you learned from the web agent, how will you learned, what you found most helpful and what you found most difficult in your interactions with the agent. You need to be specific in your evaluation. Comments such as "a cool tool" are not be appropriate.

  You analysis should be submitted in electronic from using the `handin` system.

You are encouraged to work in groups of two on the remote agent. Your analysis should be written and submitted individually.
