Title: **Glossary 6**

Introduction to Artificial Intelligence
CSCE 476-876, Spring 2003
URL: `www.cse.unl.edu/~choueiry/S03-476-876`

Berthe Y. Choueiry (Shu-we-ri)
`choueiry@cse.unl.edu, (402)472-5444`

Glossary 6:

Assigned: Monday March 10, 2003.
Due: Monday, March 24, 2003 (after Spring break)

Anytime algorithm
Arc consistency
Binary constraint
Chronological backtracking
Constraint (in a CSP)
Constraint arity
Constraint Satisfaction Problem (not AIMA!)
Constructive search
Forward checking

Continues on following page.

Glossary 6: (cont')

Global constraint

Instantiated variable

Intelligent backtracking

Iterative repair, local search

Lookahead (partial, directional, full)

Maintaining Arc Consistency (MAC)

Size of a CSP

Ternary constraint

Unary constraint

Universal constraint

Variable domain

Variable/value ordering heuristic
